Thanksgiving ordering closes 11/23 at 12PM
Christmas ordering closes 12/20 at 12PM

Thanksgiving order pickup in the Front 9:

November 25th: 2-6PM

November 26th: 2-6PM

Christmas order pickup in the Front 9:

December 22nd: 2-6PM

December 23rd: 2-6PM

December 24th: 9AM-12PM

ORDER FORM

Reheat Instructions

Remove all items from refrigerator and leave out at room temperature for 20-60 minutes prior to placing in the oven. Internal temperature after reheating should reach 165 degrees Fahrenheit.

OVEN ROASTED TURKEY

Preheat oven to 325 degrees. Pour the provided turkey broth into the bottom of the pan. Cover pan with aluminum foil. Place in oven until meat is hot throughout, about 45-60 minutes. Whole turkey can be held in the oven uncarved, at 200 degrees for up to 2 hours while the remaining items are being heated. Let turkey rest on the counter for 15 minutes covered before carving

HONEY GLAZED HAM

Preheat Oven to 325 degrees. Cover pan with aluminum foil and place ham in the oven for 10 minutes per pound (about 90 minutes). Remove from oven and let rest 10 minutes before carving.

TURKEY GRAVY / DEMIGLACE

Stovetop (Preferred): Transfer gravy into a sauce pan, reheat on medium low heat, stirring regularly to prevent scorching, until hot (about 10 minutes).

Microwave: Transfer into a microwave safe dish. Reheat, loosely covered, for about 2-3 minutes, stirring every 60 seconds.

Reheat Instructions

THE FAMILY FAVORITES

Oven (Preferred): Preheat oven to 325 degrees. Place entire pan in the oven, covered, for about 25 minutes or until dish is warmed throughout.

Microwave: Remove from pan and transfer into microwave safe dish. Heat in 30-60 second increments, stirring between, until food is warmed throughout.

PRAISE THE PASTA

Preheat oven to 325 degrees. Drizzle a light layer of extra tomato sauce to the top of the Lasagna or add a splash water or milk along the edges of Mac and Cheese before baking to keep moist. Bake 45 minutes in oven, covered. To brown the top, remove the foil and bake for another 5-10 minutes.

Rest 10 minutes before cutting and serving.

SIGNATURE BREAD PUDDING

(If you choose to reheat)

Microwave (Preferred): Remove from metal tin and place covered in microwave for 45 second intervals until center is hot.

Oven: place in a 300-degree oven, covered, until warmed throughout, about 20 minutes.

Reheat Instructions

READY TO ROAST PRIME RIB

15lb average ready to roast prime rib. Fully Cleaned, trimmed, split, and seasoned for ease of transporting, cooking, and carving. Served RAW - Ready to Roast
Split length wise so it will fit in your oven, easier to transport, and cooking times are shorter.

Special note on cooking times: Because ovens, cooking methods, roast size and shape do vary, using a meat thermometer is the most reliable way to ensure perfect results.

High Temperature Roast Option

Method: Take prime rib out of refrigerator and let stand at room temperature 1-2 hours before cooking to ensure even cooking. Preheat oven to 450 degrees. Place the prime rib in the oven, uncovered, for 15-20 minutes. Then, reduce the heat to 325 degrees for the remainder of the cooking time.

Estimated time: after the initial 15 minute high temperature sear, the roast will now cook for an additional 1-2 hours.

Target temperature: For medium rare, cook until the internal temperature reaches 125 degrees. Then pull from oven, cover in foil, and allow to rest 20-30 minutes. The roast will continue to cook an additional 10 degrees out of the oven. This will ensure a tender and juicy roast as you prepare to carve.

READY TO ROAST PRIME RIB

15lb average ready to roast prime rib. Fully Cleaned, trimmed, split, and seasoned for ease of transporting, cooking, and carving. Served RAW - Ready to Roast
Split length wise so it will fit in your oven, easier to transport, and cooking times are shorter.

Special note on cooking times: Because ovens, cooking methods, roast size and shape do vary, using a meat thermometer is the most reliable way to ensure perfect results.

Low and Slow Roast Option

Method: Take prime rib out of refrigerator and let stand at room temperature 1-2 hours before cooking to ensure even cooking. Preheat oven to 225-250 degrees Fahrenheit. Place uncovered whole prime rib in the oven until done.

Estimated time: At 225 degrees Fahrenheit, this method will take about 3.5 hours to cook.

Target Temperature: Remove the roast from the oven when it reaches 115-120 degrees Fahrenheit internally. Before serving, place roast, uncovered, back in the oven at 450 degrees for 5-10 minutes until it hits 130-135 degrees for medium rare. Cover with foil and let it rest until serving.
